

Correction to “Chiral Guided Mode Resonance with Independently Controllable Quality Factor and Circular Dichroism”

Zhancheng Li, Shiwang Yu, Guangzhou Geng, Jiaqi Cheng, Wenwei Liu, Yuebian Zhang, Junjie Li, Hua Cheng, and Shuqi Chen**

Nano Lett. 2025, 25(6), 2519–2527. DOI: 10.1021/acs.nanolett.4c06157

In the originally published article, there was an error in the description of the structural parameters of the diatomic metasurface grating (Figure 1), where l_2 and w_2 were inadvertently interchanged. The sentence “The structural parameters are $P_x = 950$ nm, $P_y = 635$ nm, $l_1 = 500$ nm, $l_2 = 150$ nm, $w_1 = 120$ nm, $w_2 = 180$ nm, $t_1 = 215$ nm and $t_2 = 275$ nm.” should read “The structural parameters are $P_x = 950$ nm, $P_y = 635$ nm, $l_1 = 500$ nm, $l_2 = 180$ nm, $w_1 = 120$ nm, $w_2 = 150$ nm, $t_1 = 215$ nm and $t_2 = 275$ nm.” This correction does not affect the results, figures, or conclusions presented in the paper. The authors apologize for the inconvenience caused by this mistake.
